

DAPHNE CHEPKIRUI

Frontend Software Engineer | UI/UX Focus

Nairobi, Kenya | chepkiruidaphne91@gmail.com | [+254 111 620 160](tel:+254111620160) | github.com/Chepkirui091 | github.com/DMT-Daph

PROFESSIONAL SUMMARY

Frontend engineer with 3+ years building web and mobile apps in React, Next.js, React Native, JavaScript, and TypeScript. Recent work includes KISRS (healthcare), insurance admin and agents portals, e-Sahal (fintech), Upeo CBC (edtech), and a carbon credits reporting platform. Strong UI/UX skills (design systems, accessibility, responsive layout) and solid frontend performance habits (code splitting, lazy loading, Web Vitals). Regular work with RBAC, dashboards, and backend teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frameworks and Libraries: React, Next.js, React Native, Material UI, Tailwind CSS, Redux, shadcn/ui, Styled Components

Tools and Platforms: Git, GitHub, Docker, Webpack, npm, pnpm, Vercel, Figma

UI/UX and Quality: Design Systems, Responsive Design, WCAG Accessibility, Jest, React Testing Library, Cypress, Web Vitals, Code Splitting

PROFESSIONAL EXPERIENCE

Frontend Developer | Dynamic Mobility Technology | Kenya | *February 2024 - Present*

- Lead frontend for KISRS (Kenya Integrated Sample Referral System): RBAC workflows, real-time referral dashboards, and UAT release (<https://uat.isrs.co.ke/>).
- Built enterprise insurance admin portal (2025-2026): agents, commissions, claims journey, digital store, and operational reporting.
- Built insurance agents portal (2025-2026): bookings, customer management, policy workflows, and agent copilot UI.
- Contributed to e-Sahal fintech mobile app (2024-2025, React Native): wallet, transactions, authentication, and onboarding.
- Led frontend for carbon credits platform (2026): feasibility workflows, reporting dashboards, and field data collection UI.
- Improved performance via lazy loading, optimized state management, and route-level code splitting in Next.js codebases.

Freelance Frontend Developer | Upeo | Kenya | *Freelance (2026)*

- Built Upeo CBC student portal: curriculum content, progress tracking, and learner workflows.
- Built responsive interfaces and API integrations for enrollment and student-facing experiences.

Frontend Developer | Tenzi Limited | Kenya | *May 2024 - January 2025*

- Built Tenzi-MRP for procurement, production planning, and inventory management (product discontinued).
- Built Tenzi-POS with offline-first IndexedDB sync, RBAC, and checkout UI (product discontinued).

Frontend Developer | CityRight Limited | Kenya | *October 2023 - January 2024*

- Built accessible interfaces and integrated REST APIs for e-commerce and marketing sites.

- Optimized frontend performance and maintained sites with team coding standards.

Frontend Developer | Computer Engineering Forum | Remote | *April 2023 - July 2023*

- Supported e-commerce builds, performance tuning, and design collaboration.

Data Analyst | AMREC | Kenya | *May 2023 - August 2023*

- Fixed data issues and built reports and charts for internal teams.

SELECTED PROJECTS

KISRS - Kenya Integrated Sample Referral System (2025-2026)

Lead frontend developer. React, Next.js, JavaScript, MUI, RBAC.

Healthcare referral management with secure dashboards and role-based workflows. Live UAT:

<https://uat.isrs.co.ke/>

Insurance Admin Portal (2025-2026)

Frontend engineer. Next.js, React, MUI, Redux, RBAC.

Enterprise insurance operations: agents, claims, commissions, and reporting. Live demo on request (NDA).

Insurance Agents Portal (2025-2026)

Frontend engineer. React, Next.js, TypeScript, MUI.

Agent workspace for bookings, customers, and policy workflows. Live demo on request (NDA).

e-Sahal Mobile Fintech (2024-2025)

React Native engineer. React Native, TypeScript.

Wallet, send-money, transactions, and authentication for Ethiopian market. Live demo on request (NDA).

Carbon Credits Platform - CarbonFlow (2026)

Frontend engineer. React, Next.js.

Sustainability reporting, feasibility studies, and AI-assisted recommendations. Live:

<http://carbonflow.sublimematrix.co.ke:3131/auth/login>

Data Aggregation Platform (2025)

Personal project. Next.js, TypeScript, MUI, Tailwind CSS.

Analytics dashboards and pipeline views. Live: <https://data-aggregation-firm.vercel.app/>

School Management System (2025)

Personal project. Next.js, TypeScript, MUI.

Admin console for teachers, subjects, attendance, and exams. Live:

<https://school-management-system-gamma-nine.vercel.app/admin>

Habit Flow (2025)

Personal project. Next.js, TypeScript, Tailwind CSS.

Personal habit tracking with streaks, reminders, and analytics.

Tenzi-POS / Tenzi-MRP (2024, discontinued)

Frontend engineer. React, TypeScript, IndexedDB.

Offline-first POS and MRP systems. Products discontinued; no live environment.

PORTFOLIO AND LIVE DEMOS

Some enterprise work is under NDA. Email chepkiruidaphne91@gmail.com or call +254 111 620 160 to arrange a demo of the projects that fit your role.

EDUCATION

Bachelor of Science in Computer Science | Laikipia University, graduated 2023

VOLUNTEER AND COMMUNITY

Mentor, Technovation (remote), December 2022 - April 2023

Mentored high-school students on product ideas and team projects.

Mentor, Google Developer Groups, Laikipia University and Kisumu

Helped developers with frontend basics and study sessions.
